### PROFILE

Joey joined Southpace Properties in 2025 as Chief Financial Officer. Joey brings experience from both public accounting and industry. He was an experienced Audit Partner with several firms. He served companies in the start-up/pre-revenue phase, privately-held middle market companies as well as multi-billion dollar public companies. He also served as the National Managing Partner of a firm's U.S. Construction industry practice. In addition to public accounting, Joey worked in the accounting and finance group of a large global general contractor.

He has served clients in the audit and technical accounting capacity for many years and has supplemented that path with deep experience in internal control structures, purchase price accounting, debt and equity transactions, accounting pronouncement implementations, and buy and sell side due diligence for acquisitions and dispositions.

In his thirty-year career, Joey has worked across a wide variety of industries representing a vast number of client complexities. His experience extends beyond the United States by serving on KPMG's SEC Desk in Europe and auditing numerous companies with significant global subsidiaries. In addition, he worked on several global projects during his role in industry.
